You'll "ride on sunshine," as "traveling theater cars" powered by a rooftop array of solar cells take you on an energy odyssey — from the Earth's beginnings to the formation of fossil fuels to the energy alternatives in our future. Along the way, discover a primeval forest complete with battling dinosaurs, earthquakes and an erupting volcano. Then travel on to the Epcot Energy Information Center, where today's emerging energy sources are revealed on a 210-foot wraparound screen. Finally, the "Universe of Energy" itself comes to life in an "electrifying" presentation on Energy's impact on 20th-century life.

Through the wonders of micro- and macro-photography, never-before-seen images of today's world unfold on the world's largest motion picture screen.

Then it's off to explore four future habitats — the urban environment of tomorrow, a robotics-staffed desert farm, a working ocean colony, and a "space city" where asteroid mining and zero-gravity crystal manufacture are facts of everyday life.

The rest of the adventure is up to you! You and your fellow passengers control which future environment to explore as you choose your own "new Horizon" for the finale.

A lot of construction is going on around the Walt Disney World Resort, so you'll have more reasons than ever to pack your bags for a return visit to the World's #1 vacation destination.

DISNEY-MGM Studios - The Studios will take guests from back-lot construction to actual filming on a sound stage. You'll experience "The Great Movie Ride," try your hand at acting, learn about production, animation and special effects. It's "lights, camera, action" all day long for the whole family. Opening Spring 1989*. Visit the **DISNEY-MGM Studios Preview Center** now at the Magic Kingdom for a "sneak preview."

Typhoon Lagoon - This all-new adventure park features the world's largest man-made watershed mountain - 95 feet high - streaming with water slides and roaring rapids up to 400 feet long. A 2½ acre wave-making lagoon and a saltwater snorkeling reef make this a one-of-a-kind adventure for water lovers. Opening Summer, 1989*.

Dreamflight - In Tomorrowland at the Magic Kingdom, Delta, the Official Airline of Walt Disney World, will present an exploration of the history of aviation from barnstorming days to the present. You'll board the "Spirit of Delta" for this journey through great moments in aviation history. Opening Summer, 1989.*

Pleasure Island - This waterfront entertainment center will feature six innovative nightclubs with dining and live entertainment as well as scores of shops - all housed on a six-acre island that was once the mythical empire of a shipbuilding entrepreneur: Merriweather Adam Pleasure. Opening Summer, 1989*.

Wonders of Life - In Future World at Epcot Center, Disney's new theatre technology will take you on a high-speed race against time in "Body Wars," a thrilling view of the human body's immune system. Another attraction, "Cranium Command" will dramatize functions of the brain, and "Fitness Fairgrounds" will present a collection of exhibits and events where you can visit a fun house of the five senses, explore the "Frontiers of Medicine," receive an analysis of your health habits, try out electronically enhanced exercises, and join the theatrical fun provided by "The Anacomical Players." Presented by Metropolitan Life Insurance Co. Opening late 1989.*

Photo Tips from Kodak

Add depth to your pictures by "framing" the subject with a foreground object such as an arch or tree branch.

To capture some of the details of exhibits, move in close. With the close-up setting on some Kodak cameras you can get as close as 18 inches.

Personalize pictures of attractions by including friends or family members in the foreground.

To help make a complete picture story, take photographs at the "photo spot" signs throughout Epcot Center. You can make title pictures by photographing identifying signs.

If you have a 35mm camera, photograph outdoor subjects after sundown and indoor subjects using fast films such as KODACOLOR GOLD 400 Film (set exposure meter at 400) and KODACOLOR VR 1000 Film (set exposure meter at 1000).
